Hbase

Run hive client:

```
export HBASE_CP='/opt/mapr/hbase/hbase-1.1.8/bin/hbase classpath'
java -cp \$HBASE_CP:hbase-1.0-SNAPSHOT.jar <class> <other_params>
java -cp \$HBASE_CP:hbase-1.0-SNAPSHOT.jar pl.isa.hadoop.CreateTable /user/xyz/table
```

Tasks

1. write code that will put transfers into hbase

2. how can we optimize querying transfers by amount for performance
