Setup

1. Download / copy to desktop (ip will be visible on a whiteboard, or usb storage will be passed)

    1. openjdk-12.0.1_windows-x64_bin.zip

    2. user_rsa

    3. .m2.zip

    4. Firefox-Installer.exe

 2. Setup socks proxy

1. run git bash

2. run 'ssh -i 'C:
   Users
   username
   id_rsa' -D 5431 -C -N ip.address

 3. Setup Firefox

1. install firefox from Firefox-Installer.exe

2. configure socks proxy for 127.0.0.1 port 5432

3. check "Proxy dns when using socks v5"

4. open http://hadoop1:8088 and check if you see anything

 4. Java projects

1. run intellij idea. If it asks for usernam / password for license click "evaluate for 30 days"

2. open in intellij every java project from code directory of this repo

3. execute maven package for every project (on the right side there should be maven options)
